DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-19 and 28, drawn to a method/system for handling resources in a cellular system, classified in class 455, subclass 453.

II. Claims 20-26, drawn to a node for determining the importance of an uplink signal and for informing a base station the importance of the uplink signal, classified in class 455, subclass 560.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II have different modes of operation.

3. A telephone call was made to Robert Mason on June 4, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2683

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
